

Staff Scheduling and Labor Management SOFTWARE for long term care and senior living

OnShift Schedule is a cloud-and mobile-based software that provides easy-to-use, predictive tools to help your communities schedule employees, predict overtime to lower costs, and fill openings to staff properly every shift.

OnShift focuses exclusively on the long-term care and senior living industry, helping providers meet their workforce management goals day-in and day-out.

Predictive Overtime Control to Reduce Costs

Prevent unnecessary overtime up to 90% with OnShift's predictive and proactive approach.

Staffing Visibility & Analysis to Drive Consistency

Get predictive analysis and real-time data with a 360° view into staffing and labor management across communities.

Labor Budget Management to Improve Care

Stay within budget, mitigate risk and staff properly and consistently to deliver high quality care.

Open Shift Management to Ensure Proper Staffing

Fill call-offs and open shifts in minutes with the best-fit employee, so you are always staffed to meet your patients' and residents' needs.

Online Scheduling for Greater Efficiencies

Extensive automation eliminates complexities and reduces time spent on scheduling up to 70%.

Mobile Schedules for Employee Engagement

Put everything employees need to manage schedules at their fingertips, on their mobile device, at any time.

“With OnShift, we have been able to take staffing to another level, which is reflected across our financial, operational and clinical successes.”

Bob Norcross, CEO & COO
Prestige Healthcare Management

Right-size your workforce with OnShift Insight. Only OnShift Insight analyzes staffing patterns and proactively recommends positions to hire for greater organizational performance.
