Real-time control. Real-world results.

SAMI unites OnShift's industry-leading scheduling software with ShiftKey's trusted marketplace of highly experienced independent healthcare professionals **for data-driven workforce optimization.**

Access top professionals for top care

Adjust your workforce as needed to drive care quality with ShiftKey's marketplace of qualified professionals. More than a third of independent professionals on the ShiftKey marketplace have a reliability score of at least 90%.

Get growing

Proactively scale to meet demand. The majority of SAMI customers grew their census up to 5x more than the national average census growth rate, resulting in an average \$1.3M revenue increase per building.

Put your employees first

Engage and retain your workforce by building an employee relief valve with more shift support and schedule flexibility. SAMI-enabled facilities increase employee satisfaction by 4% on average.

See the full picture

Get 100% workforce visibility to make data-driven workforce decisions. Access independent professional and employee utilization reports from every building across your organization in a single system.

Manage costs with precision

Maximize value and minimize costs by reducing overtime that your employees don't want to work, avoiding overscheduling and setting spending limits. SAMI users saved up to \$1.7M annually with real-time financial tracking and robust controls to optimize scheduling.

Cut out the agency middleman

Modernize your approach to filling shifts. Without the need to call multiple agencies, schedulers at SAMI facilities eliminate up to 16 hours of administrative work each week and cut agency usage by 45% on average.

*These improvements are based on SAMI customer results. Your results may vary.

Your scheduling safety net

01

Prioritize your employees

Employees can see and request shifts on the OnShift app—even ones currently requested by independent professionals—so their choices are always prioritized.

02

Set your rules

Control how far in advance, by role, open shifts are sent to ShiftKey and set budget limits.

03

Access your backup plan

If shifts aren't claimed by your employees, SAMI's technology, configured by your rules, posts them to a network of independent professionals who meet your quality and reliability criteria, then automatically updates your schedule when the shift is filled.

“Using SAMI has our team planning better, scheduling our employees more efficiently and reporting PRN more accurately. In addition to relieving the pressure on schedulers, SAMI has been extremely helpful with optimizing administrative costs.”

Jaime Babiak

VP of Operations

LECOM Institute for Successful Living

Build trust in every shift with ShiftKey

Choose the best professionals using real-time reliability and ratings data.

Reach experienced professionals so your facility is top of mind if their needs change and they look for full time work.

Curate a network you can trust and identify your favorites with just a click.
